# TEAMS DISTRIBUTION

# WORK MODEL

---

A work model in which each part is essential for the correct functioning of the next.

1

## FIRST STEPS

---

To know the real needs of our client and to analyze them is the fundamental base on which we will create a custom project and budget.

2

## BEGINNING OF THE PROJECT

---

The team responsible for the project develops the necessary techniques for the execution of the services, preparation of people teams, resources and auxiliary facilities. Then the logistics is started and the execution periods are drafted.

3

## EXECUTION OF SERVICES

---

All services are performed by our professional team (both technical and safety) according to previously established protocols.

During the execution, Coverwind carries out an exhaustive follow-up of the works, informing regularly, the status of them to the clients

4

## END OF THE PROJECT

---

With the aim that the client can assess the execution of the work done and measure their degree of satisfaction, at the end of the Project the Coverwind team will issue a final report.

# CLIENTS

---

Some corporations that have place their trust in us.

---

Since our inception, several companies and professionals have found in Coverwind a reliable partner for many of the activities related to the wind industry.
