Ocean
Ecostructures

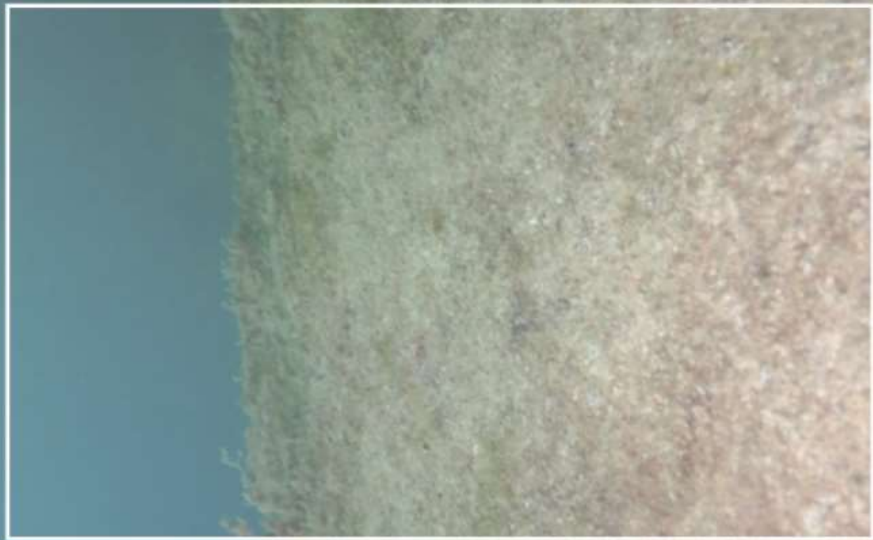

We provide INTEGRATED solutions to restore marine life, offsetting the impact of human activities in the ocean

We turn Grey spaces to Blue Oases

Integrated Solution- 1: The Product Life Boosting Unit (LBU)

Biomimcry microreefs, specifically designed to be installed on marine structures

BEFORE

AFTER

RESULTS & IMPACT – BIODIVERSITY REGENERATION

Paguriidae

Scorpaena sp

Cratena peregrina

Parablennius pilicornis

RESULTS & IMPACT – Nursery and MPA effect

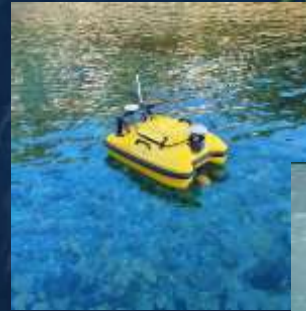

Integrated Solution-2: Services

 Monitoring

 Digital Reporting Platform

 Communication tools

 Biodesigns

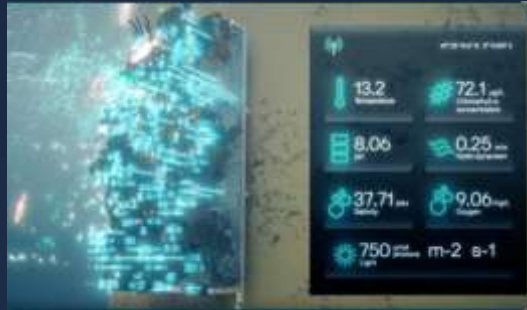

Showing evidence of the positive impact achieved

KEY NEVIRONMENTAL OUTPUTS:

- + Biodiveristy (up to x6)
- Invasive Species monitor
- Biodiversity Repositories
- Capture CO2
- + Natural Capital

A complete solution providing tangible benefits to the industry

A proven solution

- +130 units installed; +450 under negotiation
- Corporate Projects with leading groups

- 2023 Awards & Recognitions:

Our Goal:

To join forces with industry leaders
to restore +20.000 spots by 2030,
turning marine infrastructures
Into ocean allies
